About Us

NewTech Infra was founded in 2005 by Mr. Tilak Kumar with the aim to make infrastructure development fast, simpler, reliable, and hassle-free. Soon after the company was incorporated, NewTech Infra bagged many small projects in the Bengaluru region with the clear vision and objective. With the impressive and transparent developments carried out by the NewTech Infra in a timely manner, the company's work soon began to be recognized in the market and now NewTech Infra is working with reputed high profile clients in different parts of Karnataka and India.

We have proudly completed numerous projects that include Bengaluru airport, KSRTC, MRPL, Bengaluru metro, Doddaballpur Industrial Area, ITC, Bagmane Tech Park, Happy Livings, Honey Pool, Kenna Metals, Shivam Auto Tech, Subway, Tynimo, Millenium School, CMR Gandhi School.

In the span of 15 years, NewTech Infra has built a strong team who are responsible for the on-time completion of projects with the highest quality. They are experts in Engineering having deep scientific-practical and theoretical knowledge.

The perfect combination of proven technology and service-driven ethics has made us a front runner in this field and this is what defines us.

Why Choose Us

- We undertake all kinds of construction and structural projects seriously.
- We thoroughly understand the client's requirements and mobilize machinery and manpower accordingly.
- We have always delivered and will continue to deliver every project on time.
- We believe in quality and hence quality work is assured.
- 15 years of experience in the construction and structural fields.
- We have a strong team of engineers including experts and huge labor resources.
- We always follow innovative ideas using scientific principles.

Objective

To make infrastructure development fast, simpler, reliable, and hassle-free with the best innovations, design techniques using the latest tools and technology to practice world-class engineering.

To complete the infrastructure development on time with the best use of tools and technology following all the guidelines and safety measures that will not disturb the beauty of our environment.
